EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joseph J. Ruch, Jr. on May 24, 2007.

The application has been amended as follows:

Claims 1-12, 26-31, 46-57 cancel

2. The following is an examiner's statement of reasons for allowance:

Formula (3) represents an intermediate in the synthetic process of claims 13-25, and the final product in the process of claims 32-39 and 40-45. This compound is novel and non-obvious over the art of record. The closest prior art is a compound of the structure as disclosed by, for example, Tsunoda et al. (p. 1654, reference 8, compound 4). The prior art compound teaches an alkyl linkage to the imide functionality. The instant invention teaches an -O-alkyl linkage to the analogous imide functionality. In view of the imide hydrolysis mechanism taught by Ito et al., (p. 1407, 1st reaction), the instantly claimed -O-alkyl limitation renders compound of Formula (3) non-obvious to one of ordinary skill.

The synthetic process utilizing a novel/nonobvious intermediate (claims 13-25), or producing a novel/nonobvious product (claims 32-39 and 40-45) is also novel and non-obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
